## ABOUT US

Mamas Miracle aims to enhance positive pregnancy experience for couples and families through screening and flawless monitoring of at risk pregnancies.

These would include women with recurrent pregnancy losses, advanced mothers age, women with diabetes, high blood pressure, cancers prior surgeries or conditions such as lupus and sjorens syndrome and have found themselves desiring pregnancy or already in a pregnant situation.

The combined expertise in Mamas Miracle in Womens' and Public Health guarantees a wealth of precise information within the Kenyan context and the region.

# Why Choose Us

With care and support from highly qualified experts spanning local, regional and international network of professionals such as geneticists, neonatologists, fetal cardiologist and neurologists we offer tailored care to our clients.

*Dr. Rosa Chemwey*

You will equally benefit from other gynecological services such as cancer screening, general consultation and family planning services as well as surgical procedures such as removing fibroids and uterus.

We will provide your organisation with explicit and practical solutions to Global Health Maternal and Neonatal Issues.

## Our Vision

We are dedicated to the advancement of optimal and equitable women's health especially perinatal outcomes for all pregnant women in Kenya and beyond regardless of their socio-economic background.

## Our Mission

To improve women's health in Kenya and the region through the provision, advancement and dissemination of the highest quality education, standards and research information in the field of women's health

The image shows a medical ultrasound machine's control panel and monitor. The monitor displays a fetal ultrasound image with a green overlay. The control panel features a keyboard and various buttons. The text is overlaid on the image in a white, serif font.

*With care and support from highly qualified experts spanning local, regional and international network of professionals such as geneticists, neonatologists, fetal cardiologist and neurologists we offer tailored care to our clients.*
